SIG TOKEN LIQUIDITY

Investor Integration Guide

Token Name	Al Shumookh International Group Token
Symbol	SIG
SIG Contract	0xc2ac880e474c3576cc3afb7c560e402ce24d5b37
Network	Ethereum Mainnet — ERC-20 Standard
Decimals	18
Token Price	\$0.053266 USD
Uniswap Pool	0xC9185626a31Db528B400b59955f7B0aa1d142047 (SIG/USDC V2)
Master Wallet	0xBD682cfD8382a90adfDd6745780D3D7959c4d939
API Endpoint	https://api.alshumookh-pay.com/api/v1
Document Ref.	ALSH-SIG-LIQ-GUIDE-v1.0 • June 2026
Authorized by	Ahmed Mohamed — Chief Executive Officer
Contact	ceo@alshumookhgroup.ae

STRICTLY CONFIDENTIAL — For Authorised Investors Only

1. TOKEN & POOL INFORMATION

SIG Token — Smart Contract

Token Name	Al Shumookh International Group Token
Symbol	SIG
Standard	ERC-20 — Ethereum Mainnet (Chain ID: 1)
Decimals	18
Price (M1)	\$0.053266 USD

SIG Token Contract Address — Ethereum Mainnet

0xc2ac880e474c3576cc3afb7c560e402ce24d5b37

Uniswap V2 Pool — SIG / USDC

Pool Pair	SIG / USDC — Uniswap V2
Pool Link	https://app.uniswap.org/explore/pools/ethereum/0xC9185626a31Db528B400b59955f7B0aa1d142047

Uniswap V2 Pool Contract (SIG/USDC)

0xC9185626a31Db528B400b59955f7B0aa1d142047

USDC ERC-20 Contract

0xA0b86991c6218b36c1d19D4a2e9Eb0cE3606eB48

USD Coin — official contract on Ethereum Mainnet

USDT ERC-20 Contract

0xdAC17F958D2ee523a2206206994597C13D831ec7

Tether USD — official contract on Ethereum Mainnet

ALSHUMOOKH Master Wallet — Primary Receiving Address

0xBD682cfD8382a90adFdD6745780D3D7959c4d939

Accepts USDC or USDT on Ethereum Mainnet ONLY — do not send on any other network

2. SYSTEM & API ENDPOINT

API Base URL	https://api.alshumookh-pay.com/api/v1
Client Portal	https://api.alshumookh-pay.com/client
Ingest Endpoint	POST /api/v1/payloads/ingest
Protocol	HTTPS — TLS 1.3 — UTF-8 JSON
Contact	ceo@alshumookhgroup.ae

Required Headers for Every API Request

X-API-Key	Your personal API key — from ALSHUMOOKH Client Dashboard
Content-Type	application/json
Idempotency-Key	Unique UUID per request — prevents duplicate submissions

How to Get Your API Key

- Register at: <https://api.alshumookh-pay.com/client>
- Complete KYC / AML identity verification
- Log in → My Account → API Keys → Generate New Key
- Store your key securely and include it in every request as: X-API-Key:

3. METHOD 1 — ADD LIQUIDITY DIRECTLY ON UNISWAP V2

The investor adds liquidity directly to the SIG/USDC pool on Uniswap V2 using their own wallet. No intermediary — full control remains with the investor at all times.

Direct Pool Link — Open to access the SIG/USDC liquidity pool

- <https://app.uniswap.org/explore/pools/ethereum/0xC9185626a31Db528B400b59955f7B0aa1d142047>

1 Prepare Your Wallet

- Install MetaMask (metamask.io) or Trust Wallet.
- Switch to Ethereum Mainnet (Chain ID: 1).
- Hold both SIG and USDC tokens in equal USD value.
- Keep min. 0.01 ETH for gas fees.
- SIG Contract: 0xc2ac880e474c3576cc3afb7c560e402ce24d5b37
- USDC Contract: 0xA0b86991c6218b36c1d19D4a2e9Eb0cE3606eB48

2 Open Uniswap V2 Pool

- Open the pool link above or go to: <https://app.uniswap.org> → Pool → Add Liquidity.
- Ensure you select Uniswap V2 (not V3).
- Connect your wallet using 'Connect Wallet' button (top-right).

3 Select the Token Pair & Enter Amount

- Token A — USDC: 0xA0b86991c6218b36c1d19D4a2e9Eb0cE3606eB48
- Token B — SIG: 0xc2ac880e474c3576cc3afb7c560e402ce24d5b37
- Enter your USDC amount — SIG amount is calculated automatically.
- Set slippage tolerance to 1% (Settings icon, top-right of panel).
- Review the exchange rate and your projected pool share carefully.

4 Approve Tokens & Supply Liquidity

- Click 'Approve USDC' → confirm in MetaMask.
- Click 'Approve SIG' → confirm in MetaMask. (15–30 seconds each).
- Click 'Supply' → review summary → click 'Confirm Supply' → approve in MetaMask.
- Wait for on-chain confirmation (15–45 seconds — 1 to 3 Ethereum blocks).

5 Receive LP Tokens & Confirm

- UNI-V2 LP tokens are sent automatically to your wallet — they represent your pool share.
- Keep LP tokens safe — required to withdraw liquidity later.
- Copy the transaction TxHash from MetaMask or Etherscan (<https://etherscan.io>).
- View your position: <https://app.uniswap.org/#/pool>

6

Submit Confirmation to ALSHUMOOKH System

- POST <https://api.alshumookh-pay.com/api/v1/payloads/ingest>
- Headers: X-API-Key, Content-Type: application/json, Idempotency-Key:
- Body: include transaction_hash, wallet address, amount, token pair, pool contract.
- Also email ceo@alshumookhgroup.ae with your TxHash for manual confirmation.

4. METHOD 2 — MASTER WALLET TO MASTER WALLET (Managed)

The investor sends USDC or USDT from their wallet to the ALSHUMOOKH master wallet. ALSHUMOOKH manages the full liquidity injection. All gas fees are covered by ALSHUMOOKH.

ALSHUMOOKH Master Receiving Wallet — Ethereum Mainnet ERC-20 ONLY

0xBD682cFD8382a90adFDd6745780D3D7959c4d939

Accepts: USDC ERC-20 or USDT ERC-20 only. Do NOT send ETH or tokens on any other network.

1 Contact ALSHUMOOKH Before Sending

- Email ceo@alshumookhgroup.ae — state the amount and token (USDC or USDT).
- You will receive a client reference number and confirmation to proceed.
- Register on: <https://api.alshumookh-pay.com/client> and generate your API key.

2 Verify the Receiving Wallet Address

- Before sending any funds, verify this address character by character:
- 0xBD682cFD8382a90adFDd6745780D3D7959c4d939
- ALSHUMOOKH will NEVER change this address via email, chat, or any other channel.
- If you receive a different address from any source — do NOT send. Contact us immediately.

3 Send USDC or USDT from Your Wallet

- Open MetaMask, Trust Wallet, or any ERC-20 compatible wallet.
- Confirm you are on Ethereum Mainnet (Chain ID: 1) — NOT BSC, TRON, Polygon, or any other.
- Select 'Send', choose USDC or USDT, paste the master wallet address, enter amount.
- Confirm the transaction — a small ETH gas fee is charged by Ethereum network.

4 Copy the Transaction Hash (TxHash)

- After confirmation, copy the TxHash from your wallet.
- Verify on Etherscan: <https://etherscan.io> — search your sender wallet address.
- Save the TxHash — required to submit to the system.

5 Submit to ALSHUMOOKH System via API

- POST <https://api.alshumookh-pay.com/api/v1/payloads/ingest>
- Headers: X-API-Key: , Content-Type: application/json, Idempotency-Key:
- Body: transaction_hash, sender_wallet, receiver_wallet, amount, token, network.
- The system verifies your transaction on-chain automatically.

6 Email Confirmation to ALSHUMOOKH

- Email ceo@alshumookhgroup.ae with: TxHash, amount, token, sender wallet, reference number.
- ALSHUMOOKH confirms receipt and begins processing within 1 business day.
- A settlement report is sent to you by email after liquidity injection is completed.

7

Liquidity Injection by ALSHUMOOKH

- ALSHUMOOKH adds your contribution to the SIG/USDC Uniswap V2 pool.
- Pool: 0xC9185626a31Db528B400b59955f7B0aa1d142047
- All Ethereum gas fees for the injection are paid exclusively by ALSHUMOOKH.
- Zero upfront gas fee is required from the investor at any stage.

5. API PAYLOAD — SUBMISSION EXAMPLE

HTTP Request

POST <https://api.alshumookh-pay.com/api/v1/payloads/ingest>

X-API-Key	
Content-Type	application/json
Idempotency-Key	

Request Body (JSON)

```
{
  "settlement_type": "wallet_to_wallet",
  "network": "ethereum",
  "token": "USDC",
  "amount": "10000.00",
  "sender_wallet": "<your-ethereum-wallet-address>",
  "receiver_wallet": "0xBD682cfD8382a90adfDd6745780D3D7959c4d939",
  "transaction_hash": "<on-chain-tx-hash-from-etherscan>",
  "sig_contract": "0xc2ac880e474c3576cc3afb7c560e402ce24d5b37",
  "pool_contract": "0xc9185626a31Db528B400b59955f7B0aa1d142047",
  "purpose": "SIG Liquidity Contribution",
  "investor_ref": "<your-client-reference-number>"
}
```

Success Response

```
{
  "status": "RECEIVED",
  "payload_id": "<uuid>",
  "received_at": "<ISO-8601 timestamp>",
  "payload_hash": "<SHA-256 hash>",
  "message": "Transaction received and queued for on-chain verification."
}
```

HTTP Error Codes

CODE	DESCRIPTION
200/201	Success — payload received and queued for on-chain verification
400	Bad Request — invalid JSON body or missing required fields
401	Unauthorized — missing or invalid X-API-Key header
409	Conflict — duplicate Idempotency-Key, submission already processed
429	Too Many Requests — rate limit exceeded, wait 60 seconds and retry
500	Server Error — contact ceo@alshumookhgroup.ae immediately

6. QUICK REFERENCE — ALL ADDRESSES & LINKS

SIG Token Contract	0xc2ac880e474c3576cc3afb7c560e402ce24d5b37
USDC ERC-20 Contract	0xA0b86991c6218b36c1d19D4a2e9Eb0cE3606eB48
USDT ERC-20 Contract	0xdAC17F958D2ee523a2206206994597C13D831ec7
Uniswap Pool (SIG/USDC)	0xC9185626a31Db528B400b59955f7B0aa1d142047
ALSHUMOOKH Wallet	0xBD682cfD8382a90adfDd6745780D3D7959c4d939
Network	Ethereum Mainnet — Chain ID: 1

Client Portal	https://api.alshumookh-pay.com/client
Contact	ceo@alshumookhgroup.ae

SECURITY RULES — READ BEFORE SENDING ANY FUNDS

- Always verify the wallet address character by character — every digit matters.
- Send ONLY on Ethereum Mainnet — other networks (BSC, TRON, Polygon) = permanent loss.
- ALSHUMOOKH will NEVER ask for your private key, seed phrase, or upfront gas fees.
- Never share your API key — rotate it immediately if compromised.
- If you receive a different wallet address from any source, do NOT send — contact us first.
- In doubt? Always email ceo@alshumookhgroup.ae before sending any funds.

TECHNICAL SUPPORT

- Email: ceo@alshumookhgroup.ae
- Client Portal: <https://api.alshumookh-pay.com/client>
- Address: API World Tower, Office 2103/2104, Sheikh Zayed Road, Dubai, UAE — License No. 887065
- Response Time: Within 1 business day
