

ALSHUMOOKH

GLOBAL BANKING FINANCE & CREDIT

INVESTOR INTEGRATION GUIDE

SIG Token Liquidity — Complete Integration Reference

Document Ref.	ALSH-INV-GUIDE-v3.0
Version	3.0 — Production
Date	June 2026
Prepared by	ALSHUMOOKH GLOBAL BANKING FINANCE & CREDIT
Authorized by	Ahmed Mohamed — Chief Executive Officer
API Base URL	https://api.alshumookh-pay.com/api/v1
Contact	ceo@alshumookhgroup.ae

STRICTLY CONFIDENTIAL

Intended solely for authorised investors and integration partners.

1. SYSTEM OVERVIEW & API

Core Banking API

System	ALSHUMOOKH GLOBAL BANKING FINANCE & CREDIT — Core Banking API
Version	v2.0 Production
Framework	FastAPI (Python) — Async REST API
Protocol	HTTPS — TLS 1.3 enforced on all connections
API Base URL	https://api.alshumookh-pay.com/api/v1
Client Portal	https://api.alshumookh-pay.com/client
Encoding	UTF-8 — ISO-8601 timestamps (UTC)

Authentication — Required on Every API Request

X-API-Key	Your personal API key — generated from the ALSHUMOOKH Client Dashboard. Required on ALL protected endpoints.
Content-Type	application/json
Idempotency-Key	Unique UUID per submission — prevents duplicate processing

How to Get Your API Key

- Step 1 — Register at: <https://api.alshumookh-pay.com/client>
- Step 2 — Complete KYC/AML identity verification
- Step 3 — Log in → My Account → API Keys → Generate New Key
- Step 4 — Copy and store your key securely. It will not be shown again.
- Step 5 — Include it in every API request as: X-API-Key:

Key API Endpoints for Investors

METHOD	ENDPOINT	DESCRIPTION	AUTH
POST	/api/v1/payloads/ingest	Submit crypto wallet-to-wallet settlement payload	X-API-Key
GET	/api/v1/payloads/schema	Returns full JSON schema for settlement payload	None (public)
POST	/api/v1/client/register	Self-register as a new client	None (public)
POST	/api/v1/client/login	Client login — returns session cookie	Credentials
GET	/api/v1/client/me	Get current client profile and account details	X-API-Key
GET	/api/v1/client/orders	List all client payment orders	X-API-Key

GET	/health	System health check — no authentication required	None
-----	---------	--	------

2. RECEIVER DETAILS — ALSHUMOOKH

Entity Information

Legal Name	Alshumookh Alraeda Investment LLC
Trade Name	ALSHUMOOKH GLOBAL BANKING FINANCE & CREDIT
License No.	887065
Address	API World Tower, Office No. 2103/2104, Sheikh Zayed Road, Dubai, UAE
Signatory	Ahmed Mohamed — Chief Executive Officer
Email	ceo@alshumookhgroup.ae
Platform	https://api.alshumookh-pay.com

Crypto Wallet — Primary Receiving Address

Network	Ethereum Mainnet (Chain ID: 1)
Accepted Tokens	USDT ERC-20 / USDC ERC-20
Wallet Address	0xBD682cfD8382a90adfDd6745780D3D7959c4d939
USDT Contract	0xdAC17F958D2ee523a2206206994597C13D831ec7
USDC Contract	0xA0b86991c6218b36c1d19D4a2e9Eb0cE3606eB48
Gas Fees	All Ethereum gas fees paid exclusively by ALSHUMOOKH — zero upfront gas cost to sender
Confirmation	Typically 1–3 Ethereum blocks (15–45 seconds)

IMPORTANT — Wallet Address Verification

Always double-check the wallet address character by character before sending.

ALSHUMOOKH will NEVER change the wallet address via email or chat — only this document is authoritative.

Only send USDT or USDC on Ethereum Mainnet. Sending on BSC, TRON, or other networks will result in loss of funds.

Do NOT send ETH directly — only ERC-20 tokens (USDT or USDC) are accepted.

3. METHOD 1 — UNISWAP V2 DIRECT (Self-Service)

The investor adds liquidity directly to the SIG/USDC pool on Uniswap V2. Full control remains with the investor. No intermediary is involved.

1 Prepare Your Wallet

Install MetaMask (metamask.io) or Trust Wallet.

Connect to Ethereum Mainnet (Chain ID: 1).

Ensure you hold both SIG tokens and USDC in equal USD value.

Keep a small amount of ETH for gas fees (recommended: 0.01 ETH minimum).

2 Open Uniswap V2

Navigate to: <https://app.uniswap.org>

Click 'Pool' in the top navigation bar.

Select 'Add Liquidity' (make sure you are on V2, not V3).

3 Select the Token Pair

Token A: USDC

Contract: 0xA0b86991c6218b36c1d19D4a2e9Eb0cE3606eB48

Token B: SIG — paste the SIG contract address when prompted.

Confirm both tokens appear correctly in the interface before proceeding.

4 Enter Liquidity Amount

Enter the USDC amount you wish to deposit.

Uniswap will automatically calculate the equivalent SIG amount based on current pool ratio.

Review the exchange rate — ensure it is acceptable before proceeding.

Set slippage tolerance to 0.5%–1.0% for stable execution (Settings icon, top-right).

5 Approve Token Spending

Click 'Approve USDC' — confirm the MetaMask approval transaction.

Click 'Approve SIG' — confirm the MetaMask approval transaction.

Wait for both approvals to confirm on-chain (15–30 seconds each).

6 Supply Liquidity

Click 'Supply' to initiate the liquidity deposit transaction.

Review the summary: your pool share, price range, and minimum received amounts.

Click 'Confirm Supply' and approve the transaction in MetaMask.

Wait for on-chain confirmation (typically 15–45 seconds).

7 Receive LP Tokens

Upon confirmation, you automatically receive UNI-V2 LP tokens in your wallet.

These tokens represent your share of the SIG/USDC pool.

Keep LP tokens safe — they are required to withdraw your liquidity later.

8 Copy Transaction Hash

Copy the transaction hash from MetaMask or Etherscan.io.

Save your UNI-V2 LP token balance and pool address for records.

You can verify your position at any time on: <https://app.uniswap.org/#/pool>

9 Submit Confirmation to ALSHUMOOKH System

After adding liquidity, submit your transaction details to our system:

Endpoint: POST <https://api.alshumookh-pay.com/api/v1/payloads/ingest>

Header: X-API-Key:

Header: Content-Type: application/json

Header: Idempotency-Key:

Body: Include transaction hash, wallet address, token pair, and amount.

This step registers and links your on-chain liquidity to your ALSHUMOOKH account.

Contact ceo@alshumookhgroup.ae after submission for confirmation.

4. METHOD 2 — CRYPTO WALLET TO WALLET (Managed)

The investor sends USDT or USDC directly from their personal wallet to the ALSHUMOOKH master wallet. ALSHUMOOKH then executes the liquidity injection on behalf of the investor. All gas fees are covered by ALSHUMOOKH.

ALSHUMOOKH Master Wallet — Receiving Address

Network: Ethereum Mainnet (Chain ID: 1) — ERC-20 ONLY

Wallet Address: 0xBD682cfD8382a90adfDd6745780D3D7959c4d939

Accepted Tokens: USDT ERC-20 or USDC ERC-20

Gas Fees: ALL gas fees paid by ALSHUMOOKH — no ETH required from sender

1 Contact ALSHUMOOKH First

Email ceo@alshumookhgroup.ae to initiate the managed liquidity process.

Specify: the amount you wish to deposit and your preferred token (USDT or USDC).

You will receive a confirmation email with your client reference number.

Register at: <https://api.alshumookh-pay.com/client> to generate your API key.

2 Prepare Your Wallet & Verify Address

Open MetaMask, Trust Wallet, or any ERC-20 compatible wallet.

Confirm you are on Ethereum Mainnet (Chain ID: 1).

Verify the recipient wallet address character-by-character:

0xBD682cfD8382a90adfDd6745780D3D7959c4d939

IMPORTANT: Only send on Ethereum Mainnet. Do NOT use BSC, TRON, Polygon, or any other network.

3 Send USDT or USDC

In your wallet, select 'Send' and choose the token (USDT or USDC).

Paste the ALSHUMOOKH master wallet address exactly as shown above.

Enter the amount you wish to transfer.

Review and confirm the transaction — gas fee will be deducted from your ETH balance.

Wait for on-chain confirmation (typically 15–45 seconds on Ethereum Mainnet).

4 Copy Transaction Hash

After confirmation, copy the transaction hash (TxHash) from your wallet.

You can also find it on Etherscan: <https://etherscan.io>

Search your wallet address to view the confirmed outgoing transaction.

Save the TxHash — you will need it for the next step.

5 Submit to ALSHUMOOKH System via API

Submit your transaction details to our API endpoint:

POST <https://api.alshumookh-pay.com/api/v1/payloads/ingest>

Required Headers:

X-API-Key:

Content-Type: application/json

Idempotency-Key:

Required Body fields: transaction_hash, sender_wallet, amount, token, network

The system will verify your transaction on-chain and link it to your account.

6 Send Email Confirmation

Email ceo@alshumookhgroup.ae with the following details:

- Transaction Hash (TxHash)
- Amount sent and token (USDT / USDC)
- Your wallet address (sender)
- Your client reference number

ALSHUMOOKH will confirm receipt and initiate processing within 1 business day.

7 Liquidity Injection by ALSHUMOOKH

Upon receipt confirmation, ALSHUMOOKH executes the SIG/USDC liquidity injection.

Your contribution is added to the Uniswap V2 SIG/USDC liquidity pool.

You will receive a detailed settlement report via email upon completion.

All Ethereum gas fees for the injection are paid exclusively by ALSHUMOOKH.

Zero upfront gas fee is required from the investor at any stage.

5. API PAYLOAD — SUBMISSION EXAMPLE

How to Submit Your Transaction to the System

After completing either Method 1 (Uniswap) or Method 2 (Wallet Transfer), submit the following payload to register your transaction on the ALSHUMOOKH platform.

HTTP Request

```
POST https://api.alshumookh-pay.com/api/v1/payloads/ingest
X-API-Key: <your-api-key>
Content-Type: application/json
Idempotency-Key: <unique-uuid-v4>
```

Request Body (JSON)

```
{
  "settlement_type": "wallet_to_wallet",
  "network": "ethereum",
  "token": "USDT",
  "amount": "10000.00",
  "sender_wallet": "<your-ethereum-wallet-address>",
  "receiver_wallet": "0xBD682cfD8382a90adfDd6745780D3D7959c4d939",
  "transaction_hash": "<on-chain-tx-hash-from-etherscan>",
  "purpose": "SIG Liquidity Contribution",
  "investor_ref": "<your-client-reference-number>"
}
```

Success Response

```
{
  "status": "RECEIVED",
  "payload_id": "<uuid>",
  "received_at": "<ISO-8601 timestamp>",
  "payload_hash": "<SHA-256 of submitted body>",
  "message": "Your transaction has been received and is under review."
}
```

Error Codes

CODE	DESCRIPTION
200 / 201	Success — payload received and queued for processing
400	Bad Request — invalid JSON or missing required fields
401	Unauthorized — missing or invalid X-API-Key
409	Conflict — duplicate Idempotency-Key already processed
429	Too Many Requests — rate limit exceeded, wait and retry
500	Server Error — contact ceo@alshumookhgroup.ae immediately

6. SECURITY, COMPLIANCE & SUPPORT

Compliance Standards

KYC / AML	Full KYC/AML verification required for all clients prior to activation
ISO/IEC 27001:2022	Information Security Management System — certified framework
Data Encryption	AES-256-GCM for sensitive data at rest
Transport Security	TLS 1.3 — all communications encrypted in transit
Signature Verify	SHA-256 integrity verification on all inbound payloads
Audit Trail	Full immutable audit log maintained for all transactions
Settlement Network	Ethereum Mainnet — ERC-20 standard — immutable on-chain settlement

SECURITY RULES — MUST READ BEFORE SENDING ANY FUNDS

1. NEVER share your API key with anyone. Rotate immediately if compromised.
2. ALSHUMOOKH will NEVER ask for your private wallet key or seed phrase.
3. Always verify the wallet address character by character before sending.
4. Only send USDT or USDC on Ethereum Mainnet — other networks will result in permanent loss.
5. All API communications must use HTTPS — HTTP requests are rejected.
6. If you receive a different wallet address from any source, DO NOT send — contact us first.
7. ALSHUMOOKH will never request upfront gas fees or any additional payments.

TECHNICAL SUPPORT

For technical support, API integration, or compliance enquiries:
