**ALSHUMOOKH GLOBAL BANKING FINANCE
& CREDIT**

Master Wallet to Master Wallet Technical Workflow

Official technical submission guide for senders preparing JSON transfer files for master-wallet-to-master-wallet settlement with ALSHUMOOKH GLOBAL BANKING FINANCE & CREDIT.

Document Type	Transfer Type	Environment
Technical Integration Workflow	MASTER_WALLET_TO_MASTER_WALLET	Production

This document describes the required JSON file structure, upload workflow, validation rules, supported assets, and final confirmation requirements.

1. Purpose

This workflow is used when the sender prepares a batch transfer file in JSON format and uploads it to ALSHUMOOKH system for validation, operational review, and settlement tracking.

Transfer type must be exactly: **MASTER_WALLET_TO_MASTER_WALLET**

2. File Requirements

Item	Requirement
File Type	.json
Encoding	UTF-8
One File Per Batch	Each JSON file must represent one transfer batch only.
Duplicate Batch ID	Duplicate batch_id values may be rejected.

3. Required JSON Structure

```
{
  "batch_id": "MW-20260507-0001",
  "transfer_type": "MASTER_WALLET_TO_MASTER_WALLET",
  "environment": "production",
  "sender": {
    "company_name": "Sender Company Name",
    "sender_id": "SENDER-001",
    "contact_email": "operations@example.com",
    "contact_phone": "+971500000000"
  },
  "source_master_wallet": {
    "wallet_label": "Sender Master Wallet",
    "network": "ethereum",
    "wallet_address": "0xSenderMasterWalletAddress",
    "wallet_type": "master_wallet"
  },
  "destination_master_wallet": {
    "company_name": "ALSHUMOOKH GLOBAL BANKING FINANCE & CREDIT",
    "wallet_label": "ALSHUMOOKH Treasury Master Wallet",
    "network": "ethereum",
    "wallet_address": "0xBD682cfd8382a90adfDd6745780D3D7959c4d939",
    "wallet_type": "master_wallet"
  },
  "transfer": {
    "asset": "USD",
    "amount": "1000.00",
    "network": "ethereum",
    "token_standard": "ERC20",
    "expected_settlement_currency": "USD",
    "payment_reference": "MW-REF-20260507-0001",
    "purpose": "Master wallet settlement"
  },
  "transaction": {
    "tx_hash": null,
    "status": "PENDING",
    "submitted_at": "2026-05-07T12:00:00Z"
  },
  "compliance": {
    "sender_declaration": true,
    "funds_source": "Business settlement",
    "beneficiary_name": "ALSHUMOOKH GLOBAL BANKING FINANCE & CREDIT",
    "notes": "Sender confirms wallet ownership and transfer purpose."
  }
}
```

4. Mandatory Fields

Field	Description
batch_id	Unique sender batch reference.
transfer_type	Must equal MASTER_WALLET_TO_MASTER_WALLET.
sender.company_name	Legal or operating sender name.
sender.sender_id	Sender internal ID or approved partner ID.
source_master_wallet.network	Network used by sender wallet.
source_master_wallet.wallet_address	Sender master wallet address.
destination_master_wallet.wallet_address	ALSHUMOOKH destination master wallet.
transfer.asset	Token or native asset symbol.
transfer.amount	Settlement amount as a string.
transfer.payment_reference	Reference used to match the payment internally.
compliance.sender_declaration	Must be true.

5. Supported Assets and Network

For Ethereum/ERC20 settlement, the supported assets are: ETH, USDT, and USDC.

Asset	Official Ethereum Contract
USDT	0xdAC17F958D2ee523a2206206994597C13D831ec7
USDC	0xA0b86991c6218b36c1d19D4a2e9Eb0cE3606eB48

Fake tokens, wrong token contracts, unsupported assets, and wrong-network transfers may be rejected or may not be recognized automatically.

6. Destination Master Wallet

For Ethereum/ERC20 settlement, the destination master wallet is:

0xBD682cfD8382a90adfDd6745780D3D7959c4d939

The sender must verify the network, token, amount, and payment reference before initiating transfer.

7. Upload and Processing Workflow

1. Prepare the JSON file according to the structure in this document.
2. Validate the JSON syntax before upload.
3. Upload the JSON file to ALSHUMOOKH system.
4. Wait for file validation and operational review.
5. If accepted, proceed with blockchain transfer.
6. Submit or update the transaction hash after sending funds.
7. ALSHUMOOKH confirms after wallet, token, amount, and transaction hash verification.

8. Status Flow

Status	Meaning
UPLOADED	File has been uploaded to the system.
VALIDATION_PENDING	File is waiting for validation.
VALIDATED	File passed required validation checks.
REJECTED	File failed validation or operational review.
PENDING_TRANSFER	Sender is expected to initiate transfer.
TRANSFER_SUBMITTED	Sender submitted transaction hash.
CONFIRMED	Blockchain transaction has been matched.
COMPLETED	Final settlement is accepted by ALSHUMOOKH.
FAILED	Transfer failed, mismatched, or cannot be accepted.

Final settlement is valid only when ALSHUMOOKH marks the transfer status as **COMPLETED**.

9. Rejection Reasons

A submitted file may be rejected for any of the following reasons:

Invalid JSON format; missing required fields; wrong destination wallet address; wrong network; unsupported token or fake token contract; amount mismatch; duplicate batch ID; missing sender declaration; invalid or unmatched transaction hash.

10. Transaction Hash Submission

```
{
  "batch_id": "MW-20260507-0001",
  "payment_reference": "MW-REF-20260507-0001",
  "tx_hash": "0xTransactionHashHere",
  "network": "ethereum",
  "asset": "USDT",
  "amount": "1000.00"
}
```

11. Security Rules

The sender must not request or receive: Admin API Key, private keys, database credentials, webhook secrets, or treasury wallet private keys.

Only public wallet addresses, payment references, and transaction hashes may be shared for operational matching.

12. Final Confirmation Criteria

Check	Required Result
Network	Matched
Destination Wallet	Matched
Token / Contract	Matched
Amount	Matched
Transaction Hash	Confirmed
Final Status	COMPLETED

Prepared for external sender integration with ALSHUMOOKH GLOBAL BANKING FINANCE & CREDIT payment and settlement operations.
