

FNFCU Receiver Integration Guide

CashTransfer.v1 — API & Banking Reference

Prepared for: First Nations Finance Credit Union (FNFCU)

Prepared by: AL SHUMOOKH AL RAEDA INVESTMENT L.L.C

Date: May 12, 2026

Version: 1.0

Classification: CONFIDENTIAL

This document provides all technical and banking information required for FNFCU to configure their CashTransfer.v1 sender kit to route wire transfers to AL SHUMOOKH AL RAEDA INVESTMENT L.L.C. Both API notification and bank wire instructions are included.

01 Process Overview

How a FNFCU wire transfer works end-to-end with ALSHUMOOKH GLOBAL BANKING FINANCE AND CREDIT

1

Configure Sender Kit

FNFCU updates config.json with the receiver endpoint, API Key, and Auth Token provided in this guide.

2

Send API Notification

FNFCU sender.py posts the CashTransfer.v1 payload to our endpoint. System responds with 'received' confirmation and a Payload ID.

3

Execute Bank Wire

FNFCU initiates the RTGS wire transfer from their bank to ALSHUMOOKH GLOBAL BANKING FINANCE AND CREDIT's Wio Bank account (details in Section 3).

4

Confirmation & Reconciliation

ALSHUMOOKH GLOBAL BANKING FINANCE AND CREDIT operations team matches the API payload record with the bank credit and confirms receipt.

5

Settlement Complete

Both parties retain the Transfer Request ID as proof of settlement.

■ The API notification and the bank wire are two separate actions — both are required to complete a transfer. The API records the intent; the bank wire moves the funds.

02 API Integration

Endpoint, authentication, headers, and payload configuration

2.1 Receiver Endpoint

Method	POST
URL	https://api.alshumookh-pay.com/api/v1/transfer-request
Protocol	HTTPS / TLS 1.3
Format	application/json

2.2 Required Headers

Content-Type	application/json
X-API-Key	[Your API Key — provided separately via secure channel]
Idempotency-Key	Unique string per transfer (e.g. your TransferRequestID)

■ The Idempotency-Key prevents duplicate processing. Use the TransferRequestID from your CashTransfer.v1 payload as the Idempotency-Key.

2.3 config.json — Receiver Section

Add the following receiver block to your config.json:

config.json

```
"receiver": {
  "endpoint": "https://api.alshumookh-pay.com/api/v1/transfer-request",
  "api_key": "[X-API-Key – provided separately]",
  "auth_token": "[Auth Token – provided separately]"
},
"beneficiary": {
  "name": "AL SHUMOOKH AL RAEDA INVESTMENT L.L.C",
  "account": "AE600860000009960362801",
  "institution": "Wio Bank PJSC"
}
```

2.4 Payload Structure (CashTransfer.v1)

The payload must match the standard CashTransfer.v1 specification. Use the following beneficiary values for the ReceivingName, ReceivingAccount, and ReceivingInstitution fields:

POST body — CashTransfer.v1

```
{
  "Details": {
    "authToken": "[Auth Token – provided separately]",
    "account_name": "[Your FNFCU account name]",
    "account_signatory": "[Authorized signatory]",
    "account_number": "[Your FNFCU account number]",
    "currentbalance": 1000000.00,
    "amount": 250000.00,
    "fromcurrency": "USD"
  }
}
```

```

},

"CashTransfer.v1": {

  "SendingName": "FIRST NATIONS FINANCE CREDIT UNION",

  "SendingAccount": "[Your FNFCU account number]",

  "SendingInstitution": "FIRST NATIONS FINANCE CREDIT UNION",

  "SendingCurrency": "USD",

  "ReceivingName": "AL SHUMOOKH AL RAEDA INVESTMENT L.L.C",

  "ReceivingAccount": "AE600860000009960362801",

  "ReceivingInstitution": "Wio Bank PJSC",

  "ReceivingCurrency": "USD",

  "Amount": "250000.00",

  "Datetime": "2026-05-12T10:00:00.000Z",

  "TransferRequestID": "FNFCU-20260512-XXXXXX",

  "Description": "FIAT fund transfer",

  "purpose": "Investment Capital",

  "source": "Corporate Treasury",

  "method": "API"

}

}

```

2.5 API Responses

HTTP Code	Meaning	Action Required
202 Accepted	Transfer received and logged	Proceed with bank wire
400 Bad Request	Missing or invalid fields	Check payload structure
401 Unauthorized	Invalid API Key or Auth Token	Verify credentials
409 Conflict	Duplicate Idempotency-Key	Already processed — safe to ignore

■ Save the `payload_id` from the 202 response. This is ALSHUMOOKH GLOBAL BANKING FINANCE AND CREDIT's internal reference for this transfer and will be used during reconciliation.

03 Bank Wire Instructions

RTGS / SWIFT beneficiary account details for fund transfer

■ **Important:** The beneficiary name on the wire must match exactly: **AL SHUMOOKH AL RAEDA INVESTMENT L.L.C** — any mismatch may delay or reject the wire.

3.1 Beneficiary Details

Beneficiary Name	AL SHUMOOKH AL RAEDA INVESTMENT L.L.C
IBAN	AE60086000009960362801
Account Number	9960362801
BIC / SWIFT	WIOBAEADXXX
Routing Code	808610001
Account Currency	AED

3.2 Receiving Bank Details

Bank Name	Wio Bank PJSC
Bank Country	United Arab Emirates
Bank Address	Etihad Airways Centre, 5th Floor, Abu Dhabi, UAE, P.O. Box: 112437
Regulated by	Central Bank of the UAE

3.3 Accepted Currencies

The receiving account is denominated in AED. FNFCU may send in USD, EUR, QAR, or AED. Foreign currency wires will be converted at the prevailing exchange rate upon receipt by Wio Bank. Please coordinate with ALSHUMOOKH GLOBAL BANKING FINANCE AND CREDIT operations for FX rates on large transfers.

Currency	Accepted	FX Conversion
AED	Yes	None — direct credit
USD	Yes	Auto-converted by Wio Bank
EUR	Yes	Auto-converted by Wio Bank
QAR	Yes	Auto-converted by Wio Bank

04 Testing & Go-Live

Steps to validate the integration before sending live transfers

4.1 Dry Run Test

Use the --dry-run flag to validate the payload without sending:

Terminal

```
python run_transfer.py --amount 100000 --dry-run
```

4.2 Live Test Transfer

Send a small test amount (e.g. \$1,000) with both API notification and bank wire to confirm end-to-end flow:

Terminal

```
python run_transfer.py --amount 1000 \  
--purpose "Integration Test" \  
--description "ALSHUMOOKH GLOBAL BANKING FINANCE AND CREDIT receiver test" \  
--production
```

4.3 Verify Receipt

After sending, query the transfer status:

curl

```
# List all transfers  
curl -H 'X-API-Key: [YOUR_KEY]' \  
https://api.alshumookh-pay.com/api/v1/transfers  
  
# Get specific transfer  
curl -H 'X-API-Key: [YOUR_KEY]' \  
https://api.alshumookh-pay.com/api/v1/transfer/FNFCU-XXXXXXX
```

■ Go-Live checklist: (1) Dry run passes validation (2) Test transfer API returns 202 (3) Test bank wire confirmed received by Wio Bank (4) ALSHUMOOKH GLOBAL BANKING FINANCE AND CREDIT operations confirms reconciliation match

05 Support & Contact

Company	AL SHUMOOKH AL RAEDA INVESTMENT L.L.C
Address	301 - API World Tower, Office LX2103/2104A, Trade Center First, Dubai, UAE
Platform	https://api.alshumookh-pay.com
